

# Thommen Medical presents the next generation of SPI®VARIO multi tertiary parts

Temporary caps with customized **macroretentions** optimized for the production of temporary reconstructions

Impression copings made of titanium **with built-in predetermined breaking point** for efficient impression taking

One-piece protective caps with **integrated thread** for easy attachment

SPI®VARIOmulti abutments and their tertiary parts have long since been able to provide you with a solution for larger bridge restorations.

Thommen Medical now presents **the next generation of three SPI®VARIOmulti tertiary parts** to make your workflows even simpler.

If you have questions about these innovations, please do not hesitate to contact me at any time.

Driven by science, not trends.
